STOCK FOR SALE AT ALL TIMES

Parties wishing to obtain Stock Bulls or Females of choice breeding, are solicited to examine the Big Island Herd, containing representatives of the leading families, such as the Prides, Windsors, Victorias, Coquettes, Ericas, Kinnaird Fannys, Blue Bells of Kinnochtry, Mulben-Mayflowers, Westertown Roses, Sybils, Duchesses of Easter Tulloch, Lady Fannys, Durmin Lucys, etc., etc.,

BOBCAYGEON

Is a village of about 1,000 inhabitants, situated in the County of Victoria, in the Province of Ontario, 22 miles distant from the County town of Lindsay, with which town it has easy connection by boat during the season of navigation, *i.e.*, from the middle of April or first of May until the middle of November. A commodious and fast passenger steamer makes two trips daily each way between Bobcaygeon and Lindsay.

The village and vicinity is known for its pretty scenery and good fishing and boating, and is a popular summer resort with many Canadians and Americans. Bobcaygeon has also boat and stage connection with the County town of Peterboro', 24 miles distant (18 miles boat and 6 stage).

LINDSAY

Is a station on the Midland division of the Grand Trunk Railway, 69 miles north-east from Toronto (the Capital of the Province), and 43 miles north from Port Hope, on Lake Ontario, opposite Charlotte, the port of Rochester. The steamer for Bobcaygeon makes close connection with all passenger trains at Lindsay; and one can leave Toronto or Port Hope in the morning and spend a couple of hours at Bobcaygeon, and be back same evening.

In winter continue by train one station beyond Lindsay, namely, to Fenelon Falls, which is only 11 miles from Bobcaygeon, and has connection by stage, which leaves Fenelon Falls for Bobcaygeon immediately after arrival of the trains. We will prefer, however, to send our conveyance (with fur coats and other wraps) to meet all visitors at Fenelon Falls who wire us of their coming.

BIG ISLAND

Is situated in Pigeon Lake, opposite the village of Bobcaygeon; contains 1,200 acres, and is entirely devoted by Mossom Boyd & Co. to the raising of Aberdeen-Angus cattle and Clydesdale and Percheron horses. It is distant $\frac{1}{4}$ of a mile across the water from Bobcaygeon.

On it our cattle are perfectly secure from contamination by other cattle outside the herd.

FOLLOWING IS A LIST OF

FEMALES IN THE HERD

with pedigrees partly extended, for the benefit of those who have not the herd books at hand to refer to, and with some extracts from Macdonald & Sinclair's "History of Polled Aberdeen or Angus Cattle."

THE QUEEN TRIBE

Extract from Macdonald & Sinclair's History

"In the Queen tribe there is a monument to Mr. McCombie's skill and success as a breeder. We have in it the result of the combined efforts in cattle-breeding of Mr. Fullerton and Mr. McCombie, but chiefly of the latter, as the material was manipulated by him during a period of no less than thirty-seven years. In examining the career of the Queen tribe, the first point that excites notice is the illustration which it affords of Mr. McCombie's remarkable faculty of instantly and with unerring accuracy perceiving the inherent qualities and possibilities of development in an animal. This rare acquirement was undoubtedly perfected when he was transacting his immense business in buying and selling store cattle. It came to his aid on the occasion when he attended the late Mr. Fullerton's sale at Ardovie, in 1844, and made purchases that have become historical in connection with the polled breed. In that year Mr. McCombie brought to Tillyfour, from Ardovie, two young heifers, Queen Mother (348) and Jean Ann (206), full sisters, both out of Queen of Ardovie (29) and after Panmure (51). The breeding and achievements of these animals have already been described.

"There was something in their appearance and in their pedigree which fascinated Mr. McCombie, and he determined on securing more of the same sort. He obtained, after considerable trouble, the bull Monarch (44), who was got by Panmure (51), and out of Julia (671), the latter after Panmure (51), and having for dam Susanna, a full sister of Queen of Ardovie (29).

"With the produce of these closely-allied animals Mr. McCombie resolved to risk his fame as a breeder, and he had no reason to regret the choice, for the strain has made a reputation second to none in the annals of the breed.

"Monarch was twice put to Queen Mother and the produce in 1847 was Lol Montes (208), and in 1849, Bloomer (201), both of whom became celebrated prize cows. The following shows the pedigree up to this point :

It has already been explained that Mr. McCombie having, according to his own published ideas on the subject, carried in-and-in breeding to an extreme point, sought an out-cross, and procured from Mr. Watson, Keillor, the bull Angus, 45, one of the best bred and best-looking sires reared in that herd, he having been out of Old Favorite, and after the celebrated bull, Old Jock I., who was also out of Old Favorite. Lola Montes, produced in 1852, a calf by Angus, 45, which attained very high fame by her achievements in the show-yard, and also as the foundress of the branch of the Queen

tribe which Mr. McCombie himself held in greatest favor, and which is now specially associated with his name. The calf referred to was Charlotte, 303, known from her victory in the gay capital in 1856 as the 'Paris Cow.' Charlotte's calf, in 1857, was Pride of Aberdeen, 581, got by Hanton, 228, who may be also termed the 'Paris Bull,' he having gained the corresponding honors in the male class at the French exhibition, in 1856, to that obtained by Charlotte in the female section.

"A somewhat nice point arises here, Pride of Aberdeen, 581, had two full sisters, Empress of France, 578, and Daisy of Tillyfour, 1165, and we have heard the question asked, "In what consists the superiority of the Pride of Aberdeen branch of the Queen tribe over the Dandy and Daisy or Vine branches, which trace respectively to Pride's full sisters, Empress, 578, and Daisy, 1165?" Of course there was absolutely no difference in the blood of these three cows; but, while both Empress and Daisy were undoubtedly fine animals, Daisy, especially, having been a Highland Society first prize cow, and winner of the challenge cup at Aberdeen, neither of them can display a show and breeding record equal to that of the Pride of Aberdeen. Indeed, Pride of Aberdeen's career is without parallel in the chronicles of the breed. She was the first prize yearling, the first prize two-year-old, and the first prize cow at the Highland Society's shows; she gained the challenge cup at Aberdeen; and she was the first prize cow at the International Show, at Battersea, 1862, where she beat her dam, Charlotte, and was referred to as being, with Mr. Richard Booth's celebrated short horn cow, Queen of the Ocean—designated by Mr. Carr, the historian of the Booth short horns, "a superb short horn, a queen of cows"—the best female animal on the ground. Nor was this all, Pride of Aberdeen must have possessed, along with the most perfect shapes and quality, an extraordinary constitution. Few females of any breed have been able to stand three years of the forcing process necessary to keep in the front rank in the show-yard, and crown a career of unsurpassed success in exhibition, by no less distinguished performances as a breeder.

"Pride of Aberdeen produced seven female calves and four male calves that have been registered. The bulls were useful in the herds to which they were introduced, while from each of the females has sprung a race of valuable cattle.

"An examination of the circumstances, therefore, proves that it was no mere fancy that led Mr. McCombie to maintain that the Pride of Aberdeen family was the most precious branch of the Queen tribe. The favor in which the Prides are regarded has certainly not been gained by that rarity which results from infecundity. We have counted the number of female descendants of pride of Aberdeen, 581, registered in vols. II., III., IV., V. and VI., of the 'Herd Book,' and find there are no fewer than 78. The estimation in which the Prides are held by breeders is illustrated by the fact that nine of the best representatives of the family sold publicly, in 1880 and 1881, realized an average of £147 each, one cow (Mr. Auld's Pride of Aberdeen 9th) bringing £283, 10s. The Prides are distinguished in individual appearance by long, square, handsome frames, length of quarter, great size, substance and wealth of flesh; while they are known to be robust in constitution, with wonderful aptitude to mature early, and to lay on flesh and fat on the better parts.

"The cow Windsor, 202, out of Queen Mother, 348, and after Victor, 46, was the first prize-yearling heifer at the show of the Royal Agricultural Society of England at Windsor in 1851, and, besides numerous other honors, won the first prize as a cow at Berwick in 1854. She was the dam of two splendid bulls—Windsor, 221, and Rob Roy Macgregor, 267, full brothers, both having been after Hanton, 228. These remarkable animals are referred to, at length, in connection with the Tillyfour, Westertown and Kinnaird herds. Windsor, 202, is represented in the female line, only by stock tracing from her daughter Beauty of Morlich, 2072, by Angus, 45. This animal was sold to Mr. Cran, Morlich. We know little concerning her individual appearance, but good stock has been bred from her."

The numbers in brackets refer to the Filled Herd Book of Scotland. Those without brackets to the American Aberdeen Angus Record.

ERICA, COQUETTE AND LADY FANNY FAMILIES.

(Adapted from Macdonald & Sinclair's History.)

"No family of polled cattle has in recent years taken a more distinguished position in the show yard than the Ballindalloch Ericas. Since 1870 they have not been absent from the prize list of the Highland Society's shows, excepting on two occasions. We have compiled the following list of prizes gained at the Highland Society's shows by specimens of this fashionable strain: 1870, Dumfries—Cupbearer 451 out of Erica 843, second prize, two-year old bull; Elsa 977, out of Erica 843, second prize cow. 1871, Perth—Elsa, first prize cow; Enchantress 981, out of Erica 843, first prize two-year old heifer. 1872, Kelso—Enchantress, second prize cow. 1874, Inverness—Young Viscount 736, out of Erica 3rd, 1249, first prize yearling bull; Eva 981, out of Elsa 977, third prize cow. 1875, Glasgow—Young Viscount, first prize two-year old bull; St. Clair 1160, out of Erica 4th, 1697, first prize one-year old bull; Ethel 1415, out of Enchantress 981, second prize two-year old heifer. 1876, Aberdeen—Young Viscount, first prize aged bull; Bacchus 607, out of Elsa 977, very highly commended aged bull; St. Clair, first prize two-year old bull; Eva, second prize cow; Erica 6th, 3023, out of Erica 4th, 1697, fourth prize heifer. 1877, Edinburgh—St. Clair, third prize aged bull; Cluny 1283, out of Eva 981, highly commended two-year old bull; Eva, second prize cow; Echo 2976, out of Elsa 977, highly commended cow; Erica 6th, third prize two-year old heifer; Edina 2987, out of Enchantress 981, third prize yearling heifer. 1878, Dumfries—Editor 1460, out of Edith 2973, commended one-year old bull; Echo, second prize cow; Edina, third prize two-year old heifer. 1879, Perth—Editor, highly commended two-year old bull; Eva, fourth prize cow. 1881, Stirling—Express 1821, out of Eleanor 3376, fourth prize yearling bull; Essence 4547, out of Erica 9th, 3822, second prize yearling heifer.

"We have referred to the Erica family at such length in notices of the Kinnaird and Ballindalloch herds, that little remains to be said here. Erica 843, the foundress of the family, was bought by Sir George Macpherson Grant, at the Earl of Southesk's sale in 1861, for fifty guineas, her sire having been Cupbearer 59, and her dam Emily 332, by Old Jock 1, bred by Mr. Watson, Keillor; the sire and grandsire having thus been two of the most renowned show bulls of the breed. The following displays the material of which Erica's pedigree was composed:

All the existing female specimens of the Erica family are descended from either of four calves, as follows:

ERICA, 843.

Erica, 1864, calved 1865, by Chieftain, 402.	Elsa, 977, calved 1867, by Trojan, 402.	Enchantress, 981, calved 1869, by Trojan, 402.	Ella, 1205, calved 1870, by Kildonan, 401.
--	---	--	--

As previously explained, Erica 3rd, out of Erica 2nd, 1284, and Ella 1205, were sold, the former to Mr. Duff, Hillochhead, and the latter to Mr. Macgregor, Garline. Elsa and Enchantress were retained in the herd, and the family, as bred without interruption at Ballindalloch, accordingly traces from these two daughters of Erica, got by the admirably bred Queen bull, Trojan 402. The Erica sires that have been used in the Ballindalloch herd were: Elchies 563, out of Elsa; Elcho 595, out of Erica; Editor 1460, out of Edith 2973; and Young Viscount 736. The last named is at present the stock bull, being assisted by Justice 1462, a son of Elcho 595.

"Very few female Ericas have been parted with from Ballindalloch since the family acquired its reputation, and it is thus difficult to indicate with precision the market value of the tribe. Young Viscount fetched 225 guineas in public competition, and a female Erica was sold publicly in 1877 for over 100 guineas. We have heard of several female

specimens of the tribe having been sold privately at considerably over 100 guineas, and Sir George Macpherson Grant has lately had submitted to him an offer of 300 guineas for the first female Erica he can spare from his herd. The Ericas show striking uniformity of type, and display undoubted indications of high breeding. They are deep-bodied, compact, low-set cattle, with short fine legs, excellent ribs and loins, beautiful quality, graceful head, and very rich cover of flesh.

The most distinguished families associated with the Ballindalloch herd are the Ericas and Jills, to which reference has previously been made. Sir George Macpherson Grant has, however, succeeded in rearing many animals of other strains that have attained so little celebrity. The cow Sybil, 974, bred by Mr. Shaw, Bogfern, and purchased from Colonel Fraser, of Castle Fraser, had earned renown before she went to Ballindalloch. She produced there some good stock, although none of them have yet equalled the old matron's fame. The Coquette family represents the old Ballindalloch stock, the dam of Coquette, 1417, having been bred by the late Sir John Macpherson Grant. Crossed with the celebrated sires at Ballindalloch, it has produced good animals. At Ballindalloch is also preserved the Balwyllo Keepsake family, tracing from a somewhat famous cow, Keepsake, 427, by President, 205, bred at Balwyllo. The Lady Fanny family had its origin in Grannie, 131, bred by Mr. Grant, Carnousie, the first of the sort that went to Ballindalloch being Young Mary, 527, bred in 1852 by Mr. Grant, of Carron. This animal produced Lady Fanny, 971, by King Charles, 236. The Miss Burgess family, which has supplied two first prize cows at Highland Society's shows—Bertha, 980, and Maid of Avon, 2995—springs from Miss Burgess, 1198, by King Charles, 236, this animal's dam having been bred by Mr. Burgess, of Ballindalloch. The Noosgay family is another old Ballindalloch variety, tracing from Nettle by Craig, 260. It is specially noted for its milking properties.

THE KINNOCHTRY BLUE BELL FAMILY AND EASTER TULLOCH DUCHESSES, ETC.

Extract from Macdonald & Sinclair's History.

"A few remarks about the sires used at Kinnochtry will be interesting. The first notable sires used were the early Keillor Jocks, as already mentioned. Both Black Jock (3) and Young Jock (4) were Mr. Ferguson's property. They were as good as the most of the bulls to be seen at the time present, and both were splendid getters. After them came Hugh, 130, from Mr. Watson, who had been using him. Hugh was the last calf of Old Grannie, 1, and was also a very superior bull, leaving some excellent stock. The last Keillor stud bull, President 3rd, 246, bred at Balwyllie after President 2nd, 54, and out of Isabella of Balwyllie, 423, was also used. He was a long, level, stylish bull, and a prize winner at the Highland Society. The Baronet, 339, bred at Crathes, but from Keillor stock, was also used. He was quite equal to President 3rd as a getter, and was kept for a good many years. In 1863, when eight years old, he gained the first prize at the Scottish Midland Agricultural Society's show, and at Perth.

"Young Hugh, 131, after Hugh, 130, and out of Prizie, 586, was then used; being about the most gay and stylish bull Mr. Ferguson ever had. He was never fed for showing, but in 1851 he was exhibited at the Perth show of the Highland Society and, although in lean condition was highly commended. Young Hugh carried all before him at the local shows, and was sire of the cow Princess 2nd, 916, now sixteen years old, and who has twice, in lean condition, beat Highland Society prize cows. It was, Mr. Ferguson informs us, mainly from this bull that the Kinnochtry Princesses got their high bred looking and characteristic heads. Young Hugh was sold to Mr. William Watson, who was then engaged breeding polled cattle at Binns, near Dundee. After the Baronet, 339, and Young Hugh, 131, Crathie Jock, 340, calved in 1865, was used. Bred by Mr. Ferguson, he was out of Princess of Kinnochtry, 914, and got by the Baronet, 339. He gained a large number of prizes and was a remarkable instance of early maturity. Meeting with an accident, when under three years old, he was sold by weight to Mr. Young, Whitelawstone, near Dundee, when his four quarters were found to weigh 132 stones, dead weight. After Crathie Jock, Crathie 2nd, 342, also bred by Mr. Ferguson, was used. Crathie 2nd was got by the Baronet, 339, out of Miss Scott, 913, by Hugh, 130; g.d., Beauty of Kinnochtry, 595, by Young Jock, 4; g.g.d., Prizie, 586, being thus of the Baroness family. In Mr. Ferguson's possession he gained the first prizes as a yearling at the shows of the Scottish Midland and Stormount Union Agricultural Societies, in 1868. He was sold when two years old to Mr. William Owen, of Blessington, County Wicklow, and, in Mr. Owen's possession, won the first prize as a two-year-old at the National Show, in Ireland, in 1879, the first prize at the Royal Dublin Society's spring show, in 1870, and the first prize at the Irish National show, the same year. Crathie 2nd was a lengthy, gay, and fine handling, stylish bull, and Mr. Owen kept him a long time. Mr. Ferguson believes that this bull gave an impetus to the breeding of polled cattle in Ireland, leaving excellent stock in Mr. Owen's herd, as he had done at Kinnochtry."

WESTERTOWN ROSE FAMILY.

Extract from Macdonald & Sinclair's History.

"At Westertown, Fochabers, a herd of polled cattle was owned by the late Mr. George Brown's father about half a century ago, and animals exhibited from it gained prizes at the early shows of the Morayshire Farmer's Club. In 1853 Mr. John Brown gave up to his son, Mr. George Brown, the entire management of the farm. The Westertown herd may thus, for all practical purposes, be said to date from that year. When the herd was dispersed in 1874, it consisted of five families. These were the Roses, tracing from Marion 308 (calved in 1855, by the Tillyfour bull, Uncle Tom 90), bred by Mr. James Fraser, Lhanbryde, Elgin; the Victorias, tracing from Victoria of Auchinbo 127, bred by Mr. Gordon Auchinbo, who for many years owned polled cattle; the Lady Anns, tracing from Young Lady Ann 307, bred by Mr. McCombie, of Tillyfour, calved in 1850, by Victor 46, and out of Lady Ann of Balgavies 102, bred by Colonel Dalgairns, of Balgavies; and the Duchesses, tracing from Duchess of Westertown 927, bred by Mr. McCombie, of Tillyfour, calved in 1860, and bought as a calf in 1860, for 19 guineas, Duchess was got by Rob Roy Macgregor 267; a son of Windsor 202, of the Queen tribe, out of Favorite, 1237, also of the Queen tribe, and, like Windsor 202, after Hanton 228. The remaining family was the Violet, from Clara 89, bred by Mr. Brown. Among other cows in the herd, but extinct in the female line for many years prior to 1874, were Paris Kate 309, calved in 1850, bred by Mr. Bowie, and purchased in 1857 at West Scryne for £41; and Matchless 390, calved in 1849, bred at Tillyfour, after Monarch 44, and descended from the St. John's Wells herd.

"The first sire of importance used by Mr. George Brown, was Victor 46, calved in 1846, bred by Mr. McCombie, of Tillyfour, after Monarch 44, a son of Panmure 51, and out of Jean Ann 206, a daughter of Panmure 51. Then followed Uncle Tom 90, another bull bred at Tillyfour, but whose pedigree is not recorded. Next came Earl Spencer 3rd, 26, from Mains of Kelly, a great grandson of Panmure 51. In 1856 Mr. Brown bought a bull calf from Mr. McCombie, which proved the most valuable and potent animal introduced to the herd. The bull was Windsor 221, calved in 1856, after Hanton 228, and out of Windsor 202, who was a daughter of Victor 46 and Queen Mother 384, being thus very closely bred from the Panmure and Queen blood. Windsor was sold in 1858 to the Earl of Southesk, and his doings at Kinnaird and in the show-yard are fully noticed in connection with that herd. On the sale of Windsor 221, King Charles 236, bred by Lord Southesk, and descended on the dam's side from a daughter

of Monarch 44, was transferred to Westertown. The chief sires afterwards used were all bred at Westertown. They were Prince Albert 237, calved in 1858, a son of Windsor 221 and Maid of Moray 310; President 354, calved in 1859, a son of Windsor 221 and Elizabeth 391, by Victor 46, Elizabeth being of the St. John's Wells Matchless strain; Captain 468, calved in 1863, a son of President 354, and Rose 3rd, 925, by Prince Albert 237; Success 469, calved in 1865, a son of Captain 468 and Duchess 927, by Rob Roy Macgregor; March 355, calved in 1867, a son of Success 469 and Lady Ann 926, by Prince Albert 237; Baron Seltrington 356, calved in 1869, a son of Duchess 927 and March 355; and Duke of Perth 357, calved in 1870, a son of March 355 and Rose 3rd, 925. It will thus be seen that all the sires used by Mr. Brown (with the exception of Uncle Tom 90, of whose breeding there is no record) had flowing in their veins a plentiful stream of the blood of Panmure 51 and the Ardovie Queens.

"Mr. Brown was perhaps, of all breeders of polled cattle, the most systematic. There was no baphazard in his mode of breeding. He fixed upon a certain strain of blood and a certain type of cattle, and he labored to realize a distinct aim with such skill and method as has been displayed by the Messrs. Booth and Mr. Bates, in breeding Shorthorns. His cattle were bred from close affinities, but the dangers of excessive inbreeding were guarded against by keeping a large number of stock bulls. As the result of Mr. Brown's rare tact and judgement, a thoroughly characteristic herd was built up. His animals possessed a uniformity of type and style that was quite unmistakable. In the show-yard the herd had reached high eminence for several years previous to 1860, when it sustained a serious reverse. At the Highland Society's show at Dumfries that year, Mr. Brown exhibited three animals. They all won prizes, but the victory was dearly bought. The cattle caught pleuro-pneumonia at Dumfries, and communicated it to the rest of the herd; which, before the plague was stayed, was reduced to seven animals. Mr. Brown courageously, and with renewed energy and determination, resumed breeding with this remnant of a previously splendid herd. Showing was abstained from until 1868, when the bull March retrieved the laurels of the herd, and until Mr. Brown's death in 1874, show-yard honors again fell thick and fast. The new herd had thus been actually in existence for only about fourteen years, a period too brief for the maturing of Mr. Brown's plans. Had his life been spared a few years longer, it was confidently expected that Mr. Brown would have made Westertown the scene of as wonderful achievements in cattle breeding as Warlaby or Kirklevington. But this was not to be. Mr. Brown's death in 1874 abruptly terminated a career that was full of promise. At the dispersion of his herd in 1874, the animals fell into good hands. They enriched many already valuable stocks, and specimens of the Westertown families still exist in considerable numbers. It is to be regretted, however, that no one has attempted to complete the half-finished work commenced so systematically and successfully by Mr. Brown."

CHALLENGER (1860) is by Gainsborough (596), winner of first prize at the Angus Agricultural Association's show at Forfar in 1873, and of Lord Dalhousie's prize for the best bull in the yard; also the first prize at the Highland Society's show at Stirling in the same year, and the first prize at the Highland Society's show at Inverness in 1874. Challenger was a very handsome bull, and his picture is chosen to adorn the fifth volume of the Polled Herd Book; being calved four days before date specified in show regulations, he could not compete in his class, either as yearling or two-year-old. He is the sire of Coquette 11th (7838), the champion fat heifer at the Smithfield Fat Stock show, competing against all breeds. Challenger's dam is Lillas of Tillyfour (1795), of the Pride of Aberdeen family.

KNIGHT OF AVON (775) gained the third prize at the Highland Society's show at Inverness in 1874. He is got by Clansman (398), who gained the third prize in 1865, at the Highland Society's show at Inverness; also the second prize in 1867, at the Spring show at Hanff, and the first prize at Cornhill in 1868, and second at the Highland Society's show at Aberdeen same year. In 1869 he was first at the Highland Society's show at Edinburgh. In 1870 he gained a first at the Royal Northern show at Aberdeen. Knight of Avon's dam is Dandy of Drumin (949), by Rob Roy MacGregor (367); g. d. Empress of France (578), by Hanton (828); 3 d. Charlotte (803), by Angus (43); 4 d. Lola Montes (508), by Monarch (44); 5 d. Queen Mother (348), by Panmure (51); 6 d. Queen of Ardovie (89), by Captain (97); 7 d. Black Meg (766).

BARON SETTRINGTON (356), in 1870, gained the Highland Society's first prize at Dumfries, and first prize at Elgin as a one-year-old. In 1871 he won the Royal Northern Society's first prize at Aberdeen, the Highland Society's first prize at Perth, and the first prize and challenge cup at Elgin when two years old. He is got by March (335), who, in 1868, gained first prize as a one-year-old at the Highland Society's show at Aberdeen, and first prize and challenge cup at Elgin. In 1869 he won the Royal Agricultural Society of England's first prize at Manchester, and first at Elgin; in 1870, the Highland Society's second prize at Dumfries, and first at Elgin. Baron Settrington's dam is Duchess of Westertown (927), of the Queen Tribe; descended from Black Meg (766). See extract from Macdonald & Sinclair's History, given on page 29, for further particulars respecting Baron Settrington, and the remaining sires in this pedigree.

DRUMIN LUCY FAMILY.

Extract from "Macdonald & Sinclair's History of Follot Aberdeen Angus Cattle."

"The Lucy family, although now best known in connection with the Drumin and Mains of Kelly herds, is descended from one of the oldest tribes at Portlethen. They are the same strain as the bull Raglan, 208, for whom Mr. Walker, Portlethen, refused an offer of £230 from the Emperor Napoleon, in 1856. The following exhibits the composition of the pedigree:

LUCY OF PORTLETHEN, 287	{	a. Fyvie, 13.....	{ a. Old Jock, 1.....	{ a. Grey-breasted Jock, 2
		d. Bred at Keillor	{ d. Old Favorite	
	{	d. Young Miss Alexander, 16	{ a. Banks of Dee, 12.....	{ a. Rob Roy of Leys, 158
		{ c. Sir Alexander, 10.....	{ d. Portlethen Mustard, 171	{ d. Harriet of Leys, 260
		{ d. Miss Alexander, 678		

The Drumin herd was founded about 1856 by the late Mr. James Skinner, father of the present owner, Mr. W. M. Skinner. Mr. Skinner then purchased three heifers from Morayshire, the pedigrees of which were never obtained. From them spring three families, of which the first recorded members are Fortune, 945, Grace, 946, and Eliza, 960. In 1862 there were bought from Mr. Bowie, Mains of Kelly, the heifers Young Lucy, 947, and Young Raniston, 948. As these are the animals that established the families that have mainly raised the reputation of the herd, it is desirable to furnish a brief analysis of their pedigrees. Young Lucy, 947, was after Young Panmure, 232, bred by Mr. McCombie, of Tillyfour, the first prize aged bull at Dumfries Highland Society show, in 1860. He was got by Hanton, 228, and out of Crinoline, 204, one of the closest-bred Queen cows at Tillyfour, a daughter of the celebrated Charlotte, 203. Young Lucy's dam, Lucy of Portlethen, 287, was after Fyvie, 13, a son of the Keillor bull, Old Jock, 1. Lucy of Portlethen, 287, was out of the same cow as Raglan, 208, who was in the prize list at the Paris Exhibition, in 1856, when Mr. Walker, Portlethen, his breeder, refused an offer of £230 from the Emperor Napoleon. Young Raniston, 948, was after Alford, 231, a son of Hanton, 228, and the Queen cow, Fair Maid of Perth, 313, a first prize winner at the Royal English and Highland Society's shows. From these two heifers, acquired from Mr. Bowie, are descended the Lucy and the Beauty families."

LOGIE THE LAIRD 3RD (862) gained the first prize at the Angus Agricultural Society's show at Montrose in 1873; also the third prize at the Highland Society's show at Aberdeen in 1876. He is got by Gainsborough (396) who gained, in 1873, the first prize at the Angus Agricultural Association's show at Forfar, and Lord Dalhousie's prize for the best bull in the yard; the first prize at the Highland Society's show at Stirling, in the same year, and the first prize at the Highland Society's show at Inverness in 1874. The dam of Logie the Laird 3rd is Lizzie 4th (2249) by the Highland Society prize bull, Jim Crow 3rd (350); g.d. Lizzie 3rd (1603) by Lurgan (499), a son of Lola Montes (208); 3 d. Lizzie 2nd (349) by Earl Spencer 4th (27); 4 d. Lizzie (227), who gained the first prize, as a two-year-old heifer, at the East Forfarshire Farming Association show, and the first prize as a cow at the Angus Agricultural Society's show, in 1855; she was not shown at the Highland Society's show.

JESTER (472) was commended at the Highland Society's show at Inverness in 1874. He is got by Victor of Ballindalloch (403), dam Jilt (973) by Black Prince of Tillyfour (366); g.d. Beauty of Tillyfour (1180) by Young Jock (4); 3 d. Favorite (9) by Grey-breasted Jock (2).

CLANSMAN (398) gained, in 1865, the third prize at the Highland Society's show at Inverness. In 1867 he won the second prize at the spring show at Banff, and in 1868 he won the first prize at Cornhill, and second at the Highland Society's show at Aberdeen. In 1869 he won the first prize at the Highland Society's show at Edinburgh. In 1870 he gained a first prize at the Royal Northern show at Aberdeen. He is got by Damascus (425), dam Magdeline (817) by Napoleon (237), etc., etc.

MARSHALL (399). We quote the following respecting this bull from "Macdonald & Sinclair's History": "Marshall was by Black Prince of Tillyfour, 366, a son of Rob Roy Macgregor, and out of Fancy of Tillyfour (1193), a daughter of the Belle (203). Marshall was a grand bull of great substance, and the characteristic of size which still follows the Drumin stock was inherited from him."

YOUNG PANMURE (232) was bred by Wm. McCombie, of Tillyfour, and is got by Hanton (226) and out of Crinoline (204). He gained the first prize as a one-year-old at the Highland Society's show at Aberdeen in 1858, and the second prize at the Angus Agricultural Association in the same year; the first as a two-year-old at the Angus Agricultural Association in Dundee in 1859; the first at the Glasgow Agricultural Association, and the second at the Highland Society's show at Edinburgh, all in the same year; the first as a three-year-old at the Highland Society's show at Dumfries in 1860, and the first at the Angus Agricultural Association at Forfar in the same year. Young Panmure also obtained the 1st prize at the Royal English Agricultural Society's show at Leeds in 1861.

ROTHIEMAY FAMILIES.

Extract from Macdonald & Sinclair's History.

"The foundation of the present Rothiemay herd may be said to have been laid by the purchase by Major Tayler of two black polled cows named Old Lady Jean and Miss Morrison, from the late General Hay, of Rannes, and a bull named Fintray 125, from the late Mr. James Walker, Wester Fintray, about the year 1846. The cows were very large and strong. Their descendants have been regularly retained and bred from, and in the 'Herd Book' the pedigree of the strains established by these fine animals trace from Old Lady Jean 187, and Miss Morrison 833. Another cow early added to the herd was Victoria, of Glenbarry 534, calved in 1855, after Black Jock of Mulben 104. She was acquired from her breeder, Mr. Paterson, Mulben. From Old Lady Jean the Rothiemay Georgina tribe has sprung, through Georgina of Rothiemay 532, by Fintray 125, calved in 1852; from Miss Morrison the Rothiemay family of that name descends, and a third family comes from the Mulben cow, Victoria of Glenbarry 534. This then was the material on which Mr. Tayler's fine herd has been reared. For many years no females were added besides those bred in it, and much of its success is due to the careful selection of sires. At Mr. McCombie's sale at Tillyfour, in 1857, the bull Napoleon 257 was bought for 40 guineas. Napoleon was out of Bloomer 201, a daughter of Queen Mother 348, and after Hanton 228. He was described by Mr. McCombie in the sale catalogue as being 'got by the best bull, and out of the best cow in the world in the opinion of the exposé.' Napoleon was also individually a first-class animal; he won the second prize as a two-year old at the Aberdeen show of the Highland Society, in 1858, and was used in the herd for a considerable time. The next sire used was Damascus 495, bought when a calf at the Earl of Southesk's sale in 1861. After the Queen bull Windsor 221, he was out of Deodora 1232, of the Kinnaired Dora family. Damascus was a splendid bull, and left excellent stock. By these two bulls some of the best blood in the country was infused into the herd. Napoleon was very strong in the Tillyfour Queen blood, which was also continued by the sire of Damascus; while the dam of the latter was after a son, and out of a daughter of Cupbearer 59, through whom the Keillor and Mains of Kelly strains were introduced.

"Then followed Elector 427, bred by Colonel Gordon, winner of the third prize at the Highland Society's shows in 1870 and 1871, and second in 1872. The other sires used were Bon Accord 446, bought from the Earl of Fife in 1871, winner of the second prize at the Highland Society's show at Kelso, in 1872; Canmore 626, bought in 1874 from Mr. Elmslie, Cardenston; Waterside King 870, after Mr. Bowie's Major 3rd, 662, and of the Kinnaired Fanny family, purchased in 1876 from Mr. Wilken, Waterside of Forbes, and Sir Maurice 1319, of the Fyvie Flower family, purchased at Colonel Gordon's sale in 1876, when a calf for 42 guineas.

At least three distinguished bulls have been bred in the herd, viz.: Clansman 398, of the Miss Morrison family, third prize winner at the Highland Society's show at Inverness in 1865, second at the same Society's show in 1868, and first at Edinburgh in 1869; Sir Roger 702, of the Georgina family, who was second prize one-year-old at the Highland Society's show at Glasgow in 1875, and died when rising two years old; and Sir Willfrid 1166, of the Georgina family, first prize one-year-old at the Highland Society's show at Aberdeen in 1876, and second prize two-year-old at Edinburgh, 1877.

As formerly remarked, comparatively few females have been introduced to the herd. Among these, however, may be named Fashion 982, and Nosegay 2nd, 2156, from Sir George Macpherson Grant, and Crocus 2nd, 3765, from Mr. Hannay. Mr. Tayler has succeeded in rearing three families of much merit, the Georginas, Miss Morrisons and Victorias. From what we have already said, it will be seen that the members of these families have proved themselves worthy of the attention bestowed on them."

KINNAIRD FANNY FAMILY.

Extract from Macdonald & Sinclair's History.

"This family is valuable not only on account of the individual merit of its members, but also because by it is preserved one of the oldest and finest Kinnaird tribes. It is perhaps the case that it represents the earliest polled strain of which records exist. The first animal of the family registered in the "Herd Book" was Old Lady Lady Ann, 743, and there is evidence that she was calved about 1820, four years prior to the birth of Old Grannie, 1. The family is represented by two branches, thus:

Old Lady Lady Ann, 743.

Old Bell, 98.

Smutella 329.

Fanny of Kinnaird, 330.

Flora of Portlethen, 244.

Formosa, 186.

Flora of Portlethen, 244, was sold to Mr. Walker, Portlethen; and Formosa, 186, was sold to Mr. Scott, of Easter Tulloch. The following shows the composition of the Fanny pedigree:

FANNY OF KINNAIRD, 330	s. Southesk, 34.	s. Colin, 35...	s. Wattie, 135
		d. Lucy, 670	d. Lucy, 670
	d. Smutella, 329.	s. Colin, 35...	s. Wattie, 135
		d. Old Bell, 98	d. Old Bell, 98
		s. Bred by Mr. Mustard, Fithie	s. Bred by Mr. Mustard, Fithie
		d. Old Lady Ann, 743	d. Old Lady Ann, 743

"Old Lady Ann, 743, we may here remark, is also represented by the Lavender family at Melville, Lavender of Kinnaird, 1007, having been her great-grand-daughter, and also by the Rebecca family at Easter Tulloch."

CHALLENGER (1260) is, by Gainsborough (596), winner of first prize at the Angus Agricultural Association's show at Forfar in 1873, and of Lord Dalhousie's prize for the best bull in the yard; also the first prize at the Highland Society's show at Sterling in the same year, and the first prize at the Highland Society's show at Inverness in 1874. Challenger was a very handsome bull, and his picture is chosen to adorn the fifth volume of the Polled Herd Book; being calved four days before date specified in show regulations, he could not compete in his class, either as yearling or two-year-old. He is the sire of Coquette 11th (7838), the champion fat heifer at the Smithfield Fat Stock show, competing against all breeds. Challenger's dam is Lillias of Tillytour (1795), of the Pride of Aberdeen family.

KNIGHT OF AVON (775), gained the third prize at the Highland Society's show at Inverness in 1874. He is got by Clansman (398), who gained the third prize in 1865 at the Highland Society's show at Inverness; also the second prize in 1867 at the Spring show at Banff; and the first prize at Cornhill in 1868; and second at the Highland Society's show at Aberdeen same year. In 1869 he was first at the Highland Society's show at Edinburgh; in 1870 he gained a first at the Royal Northern show at Aberdeen. Knight of Avon's dam is Dandy of Drumin (949), by Rob Roy Macgregor (267); g.d. Empress of France (578); by Hanton (228); 3 d. Charlotte (203), by Angus (45); 4 d. Lola Montes (208), by Monarch (44); 5 d. Queen Mother (348), by Panmure (51); 6 d. Queen of Ardovie (29), by Captain (97); 7 d. Black Meg (766).

BARON SETTRINGTON (356), in 1870, gained the Highland Society's first prize at Dumfries, and first prize at Elgin as a one-year-old. In 1871 he won the Royal Northern Society's first prize at Aberdeen, the Highland Society's first prize at Perth, and the first prize and challenge cup at Elgin when two years old. He is got by March (355), who in 1868 gained first prize as a one-year-old at the Highland Society's show at Aberdeen; and first prize and challenge cup at Elgin. In 1869 he won the Royal Agricultural Society of England's first prize at Manchester, and first at Elgin; in 1870 the Highland Society's second prize at Dumfries, and first at Elgin.

BARON SETTRINGTON'S dam is Duchess of Westertown (927) of the Queen Tribe descended from Black Meg (766).

See extract from Macdonald & Sinclair's History, given in advance of Lot 35, for further particulars respecting this pedigree.
